PROJECTS

Wax & Wicks | https://github.com/ladykays/wax-and-wicks | https://jocular-empanada-77cf44.netlify.app/

- **Summary:** Collaborated with a team of four to create an online store for candle enthusiast seeking premium-grade candles. The site was deployed to Netlify

- R**esponsibility:** I was responsible for building the repository, establishing the file structure, designing the navbar, footer, basket, contact, and checkout components, implementing the checkout functionalities and deploying the site to Netlify. To ensure that the project was completed on time, I provided guidance and direction to the team throughout the process.

- **Tools/ Languages Used:** HTML, CSS, JavaScript, Tailwind CSS, React.js, MUI

Weather Pourcast | https://github.com/ladykays/Weather-Pourcast | https://jessie93.github.io/Weather-Pourcast/

- **Summary:** Collaborated with a team of 4 to create an application that provides users with recommendations for cocktails based on the temperature in any location entered by the user.

- R**esponsibility:**I was responsible for creating the footer, favourite page and the functionalitiy for getting weather from the OpenWeather API, performing the "Roll Again" function. I also helped with bug fixing.

- **Tools/ Languages Used:** HTML, CSS, JavaScript, jQuery, Moment.js, OpenWeather API, TheCocktailDB API

Workday Scheduler | https://github.com/ladykays/work-day-scehduler | https://ladykays.github.io/work-day-scehduler/

- **Summary:** This is an app that enables a user to save events for each hour of their work day.

- R**esponsibility:** I began with a starter code and modified the CSS, HTML files and added the functionalities to achieve the desired result.

- **Tools/ Languages Used:** HTML, CSS, JavaScript, jQuery, Moment.js, Bootstrap, Font Awesome
